Imperial Core Bond, the latest Industrial Grade Engineered Cement from Kingdom Products, is a multi-use polymer modified cement-based product designed for use as a basecoat over EIFS applications and mortar substrates. **Imperial Core Bond** can also be used as an adhesive for applying pre-manufactured, lightweight stone veneer. When used in conjunction with $\frac{3}{4}$ " AR glass fiber it can be used as a structure coat over irregular shaped foam core designs. Bond Foam to Foam - Foam to Masonry - Masonry to Masonry.
